

Model: 119748-00 - 7610150

**DESCRIPTION**

- Single stage
- 240 volts
- 5.1", 130 mm diameter
- Double ball bearings
- Single speed
- Thru-Flow discharge
- Steel fan end bracket
- Steel cup commutator bracket

**DESIGN APPLICATION**

Equipment operating in environments not requiring separation of working air from motor ventilating air  
 Designed to handle clean, dry, filtered air only

**SPECIAL FEATURES**

- Suitable for 240 volt AC operation, 50/60 Hz
  - UL recognized, category PRGY2 (E47185)
  - Provision for grounding
  - Skeleton frame, cup design
- The Lamb vacuum motor line offers a wide range of performance levels to meet design needs

**DIMENSIONS**

NOTES:

1. MOUNTING MUST NOT RESTRICT THIS DIAMETER.

**IMPORTANT NOTE:** Pictorial and dimensional data are subject to change without notice. Contact factory for current revision levels.

**WARNING** - Ametek/Lamb Electric thru-flow vacuum motors must never be used in applications in which wet or moist conditions are involved, where dry chemicals or other volatile materials are present or where airflow may be restricted or blocked. Such motors are designed to permit the vacuumed air to pass over the electrical winding to cool it. Thus any foam, liquid (including water), dry chemical or other foreign substance will come in contact with electrical conductors which could cause combustion (depending on volatility) or electrical shock. Failure to observe these precautions could result in property damage and severe personal injury, including death in extreme cases. All applications incorporating Lamb motors should be submitted to Underwriters Laboratories Inc. or other appropriate organizations or agencies for testing specifically related to the safety of your equipment.
