

# MicroTherma 3

## microprocessor thermometer

- FREE traceable certificate of calibration
- automatic re-calibration feature

The MicroTherma 3 microprocessor thermometer measures temperature over the range of -200 to 1372 °C with a 0.1 °C resolution. Each thermometer incorporates an easy to read, 4½-digit dual LCD display with open circuit, low battery and hold indication.

The thermometer should never need re-calibrating as the microprocessor enables the instrument to automatically carry out self-diagnostic re-calibration.

Each unit incorporates an auto-power off facility that maximises battery life, turning the instrument off automatically after 30 minutes. For details of the wide range of thermocouple probes available, see pages 61 to 66.

specification	MicroTherma 3
range	-200 to 1372 °C
resolution	0.1 °C
accuracy	±0.2 °C ±1 digit
battery & life	2 x 1.5 volt AAA - 1000 hours
sensor type	thermocouple type K
display	12.7 mm LCD
dimensions	35 x 73 x 141 mm
weight	220 grams
<i>FREE traceable certificate of calibration included</i>	

### order code description

221-081	MicroTherma 3
830-205	protective silicone boot - white
<i>the MicroTherma 3 is exclusive of probe</i>
