

cooking thermometers

frying thermometer

The frying thermometer incorporates a $\text{Ø}50\text{mm}$ dial and a pointed, stainless steel $\text{Ø}4 \times 150\text{mm}$ stem. The frying thermometer indicates temperature over the range of 0 to $+300^{\circ}\text{C}$ in 10°C divisions. For the most accurate temperature recording, insert the thermometer in the thickest part of the product. The dial is clearly marked for meat, poultry, fish and chips.

order code	description
800-805	frying thermometer
